PCB Design Rules for SVG2Shenzhen
=====

Wolfgang Spahn, 2022

- drawings have to be in their specific layers
- 1 mm in Inkscape will be 1 mm in KiCad
- path may have an outline and a filling
- colors will be ignored
- only rect, arc, and circle are supported, other forms have to be converted into a path
- in the Edge.Cut layer there has to be paths only with outline and no filling, don't use any groups, one has to convert the object into a path
- in the the Drill layer use circles for the holes.
 These drills will not have any annular rings
 unless you add them to the F.Cu and B.Cu layers
- don't use any groups
